Why Is Coinbase Giving Me a $50 Limit? {Get Instant Help}

If Coinbase is showing you a $50 limit, it usually means your account currently+1-888-394-2349 [USA/OTA] has a restricted buying, selling, sending, or +1-888-394-2349 [USA/OTA]withdrawal limit. Coinbase sets account limits based on several factors, including your identity verification status, payment method+1-888-394-2349 [USA/OTA], account history, location, transaction activity, security+1-888-394-2349 [USA/OTA] checks, and compliance requirements. New accounts or accounts with limited verification often start with lower limits until Coinbase can confirm more+1-888-394-2349 [USA/OTA] information about the user and account activity.

A low limit can also happen if your account is not fully verified, +1-888-394-2349 [USA/OTA]your payment method has limitations, or Coinbase has detected unusual activity that requires additional security review. For example, users who recently+1-888-394-2349 [USA/OTA] created an account, changed account details, added a new+1-888-394-2349 [USA/OTA] payment method, or experienced failed transactions may+1-888-394-2349 [USA/OTA] temporarily receive lower limits. Completing identity verification, adding and confirming a payment method, and maintaining a secure account may help+1-888-394-2349 [USA/OTA] increase available limits over time.

Coinbase limits are also affected by your region and the type +1-888-394-2349 [USA/OTA]of transaction you are trying to complete. Buying crypto with a debit card, bank transfer, or other payment method may have different limits. If +1-888-394-2349 [USA/OTA]you believe your limit is lower than expected, check your Coinbase+1-888-394-2349 [USA/OTA] account settings, review any verification requirements, and look+1-888-394-2349 [USA/OTA] for notifications explaining the reason for the restriction. Never share your password, two-factor authentication codes, private keys, +1-888-394-2349 [USA/OTA]or wallet recovery phrase with anyone claiming they can increase your Coinbase limit.
